

Science Force 2011-2012

What is Science Force? A PTA funded program that brings labs to each grade. The labs are paced with what the students are learning throughout the year.

The labs are run by volunteers. If we do not have volunteers, the labs will not be taught for that class. Getting volunteers is very important!! The labs are fun and the kids love having parents/ grandparents there!

Room parents- An email will be sent to remind the room parents that they will need to get parent volunteers for the upcoming lab.

Volunteers- it is a 1 hour commitment and there will be a demonstration on the web so they are familiar with the lab before going into it.

Registry – A Target registry named Science (First name) Force (Last name) has been created if parents want to help with science force supplies.

Website-site will be updated with the lab and video the weekend before the lab.
